Subject: Draft Superfund Cleanup Plan for Portland Harbor

I must raise my objections to your draft Portland Harbor Cleanup Plan. I have the following concerns and thoughts:

- It leaves too much of the river contaminated for generations to come.
- It relies too much on monitored natural recovery that is a do nothing strategy that leaves pollution in the river hoping it will be flushed downstream.
- It must result in the removal of the fish consumption advisory so that eating fish in this area is as safe as any other part of the Willamette river system. This must occur in a reasonable timeframe of 10 to 20 years.
- Creating and leaving a toxic waste dump in our city's river is NOT acceptable. Toxic sediments must be taken to an appropriate landfill. - Those liable for the pollution MUST be held accountable and pay for COMPREHENSIVE cleanup that will protect the health of our community, environment, and wildlife.

Please work to do more for the current and future citizens of Oregon.

Sincerely,
